LEGIC®
innovation in ID technology

Becoming a LEGIC® licence partner – step by step

Level 1 – Familiarising yourself with LEGIC®

At Level 1 you get an opportunity to familiarise yourself with LEGIC and its services. A host of documentation is available, both printed and online at **www.legic.com.**

Level 1 will give you an overview of the many applications of LEGIC and how the LEGIC technology supports various solutions.

Level 2 – LEGIC® Evaluation

Level 2 follows the signing of a non-disclosure agreement (NDA). During this phase, LEGIC offers you a complete information and demonstration package, together with a wide range of services.

The goal at Level 2 is to provide you, as a prospective future licence partner, with all the information needed to test LEGIC tailored to your individual needs. Obtained insights and knowledge, which you will acquire at this level, will then serve you as the basis to decide whether to become a LEGIC partner.

Level 3 – With LEGIC® into the future

The next step would be the finalisation of the licencing agreement. You will then receive documentation, practical demonstrations and training to make you fully conversant with the design and implementation of LEGIC applications. At the same time, you will be covered by patent and trademark protection worldwide. Depending on the type of your licence you are entitled to purchase LEGIC components and a Master-Token.

Benefit from various valuable services

- Access to the entire confidential documentation for an easy and quick implementation of the system technology
- Comprehensive training
- Technical support hotline
- Annual partner seminar, an ideal platform for networking
- Helpful development and configuration tools like the Antenna-Designer for the design and tuning of printed circuit board antennas
- Extensive Marketing support, e.g. the presentation of your products / solutions on our website and at international exhibitions, publications of press releases and many more
