My Presentation

SM-6310 with
Custom Code

Main Usage

Development
with DK-6310

Success Story
InTallyCom

The 6000 Series Family Members

SM-6300 Security Module

**SM-6310 Security Module
with Custom Code functionality**

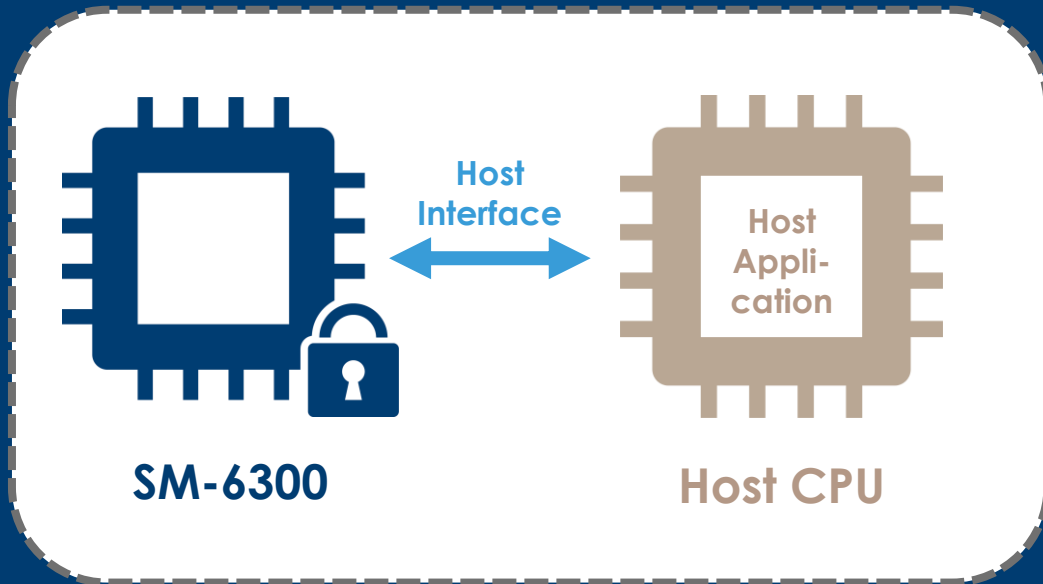

SM-63x0 – RFID, Bluetooth and Secure Element in one Module

- ✓ Reads all globally relevant RFID standards
- ✓ Compatible with LEGIC prime, advant and neon as well as MTSC and LEGIC Orbit
- ✓ Fulfills the highest security requirements due to the Secure Element

Makes the world of ID and IoT more secure

CC = Replacing Host Interface (HW) with API (SW)

Standard Hardware

Custom Code Hardware

When to Prefer the SM-6310 over the SM-6300

Limited physical
space available

Minimal power
consumption needed

Cryptographic
functions

new

Latest Updates for Custom Code Functionality

Memory for Data

512 kB flash for data in download area
&
128 kB flash for code

Bluetooth wake-up

→ 15.6 μ A consumption in sleep mode

Download and Run
Custom Code

Success Story with **InTallyCom**

1. New requirement for electro mobility:

- VDE-AR-E 2532-100 → Elliptic Curve
'Brainpool 256r1' needed
- Creation and sign of the German
„Eichrecht“ data set for up to 4
metering devices in one charging
station

2. New OS50 Release V2.2.1.0

other projects &
OEM solutions

Cryptographic Functions with Custom Code

- **AES-128/256** (ECB or CBC modes)
- **Elliptic-curve** NISTP-256 and P-384,
- **Hashing**: SHA1-160, SHA2-256/384
- Message authentication via **CMAC**

Brainpool 256r1 & 384r1

Another product using Custom Code - Skyra

Running with
Custom Code

Thank you
