

LEGIC
Utility App

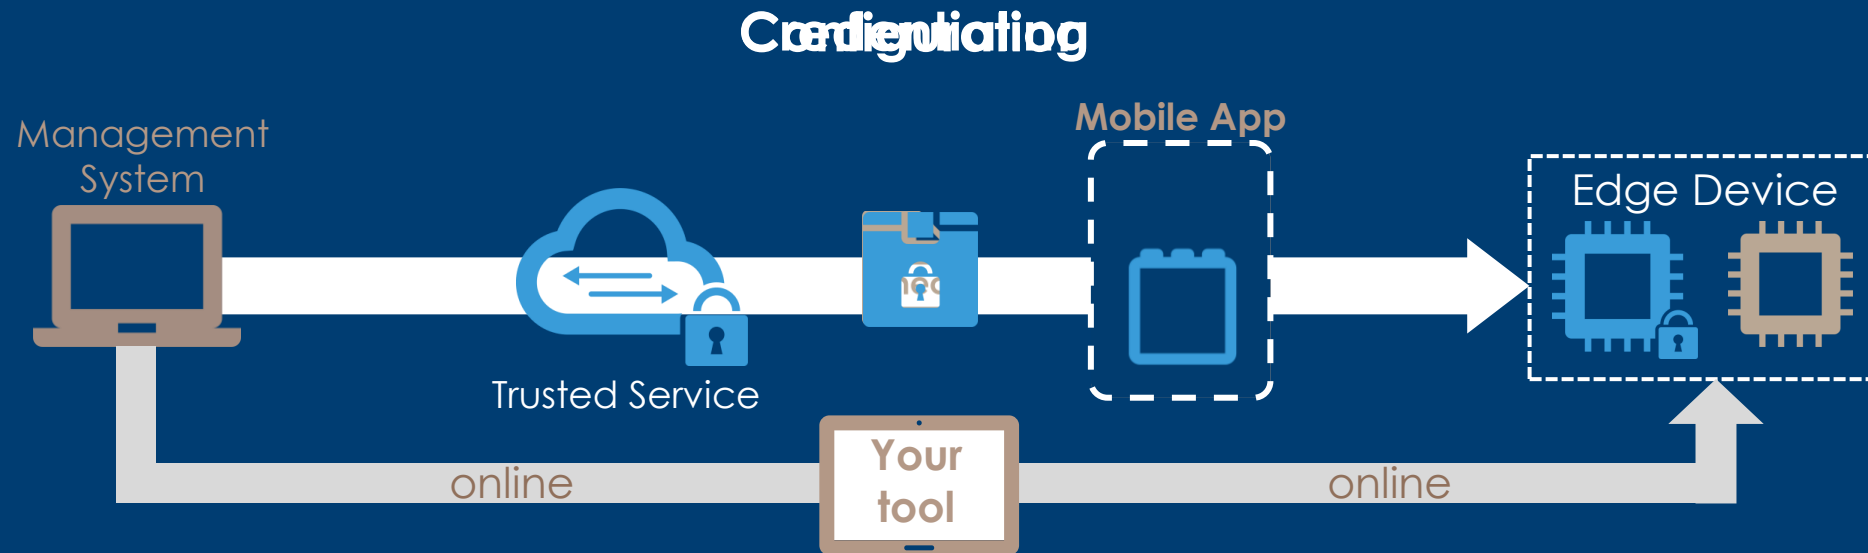

Goran Stevanovic
connect23

Initial State

Goal: End-to-End security platform enabling your business case

Demand:

A configuration tool using LEGIC Orbit to transport non-visible cryptographic keys

→ supports your installation process and reduces effort

Our Solution

LEGIC mobile app for LEGIC Orbit key and configuration management

Universal configuration tool:

- Replaces the need to develop own tool
- Simplifies secure device commissioning and maintenance
- Provides more flexibility for you and your customers

The Concept

A LEGIC mobile app, based on the LEGIC Mobile SDK

Serves for commissioning and maintenance of LEGIC enabled devices

Uses VCP files to transport:

Project-specific cryptographic keys

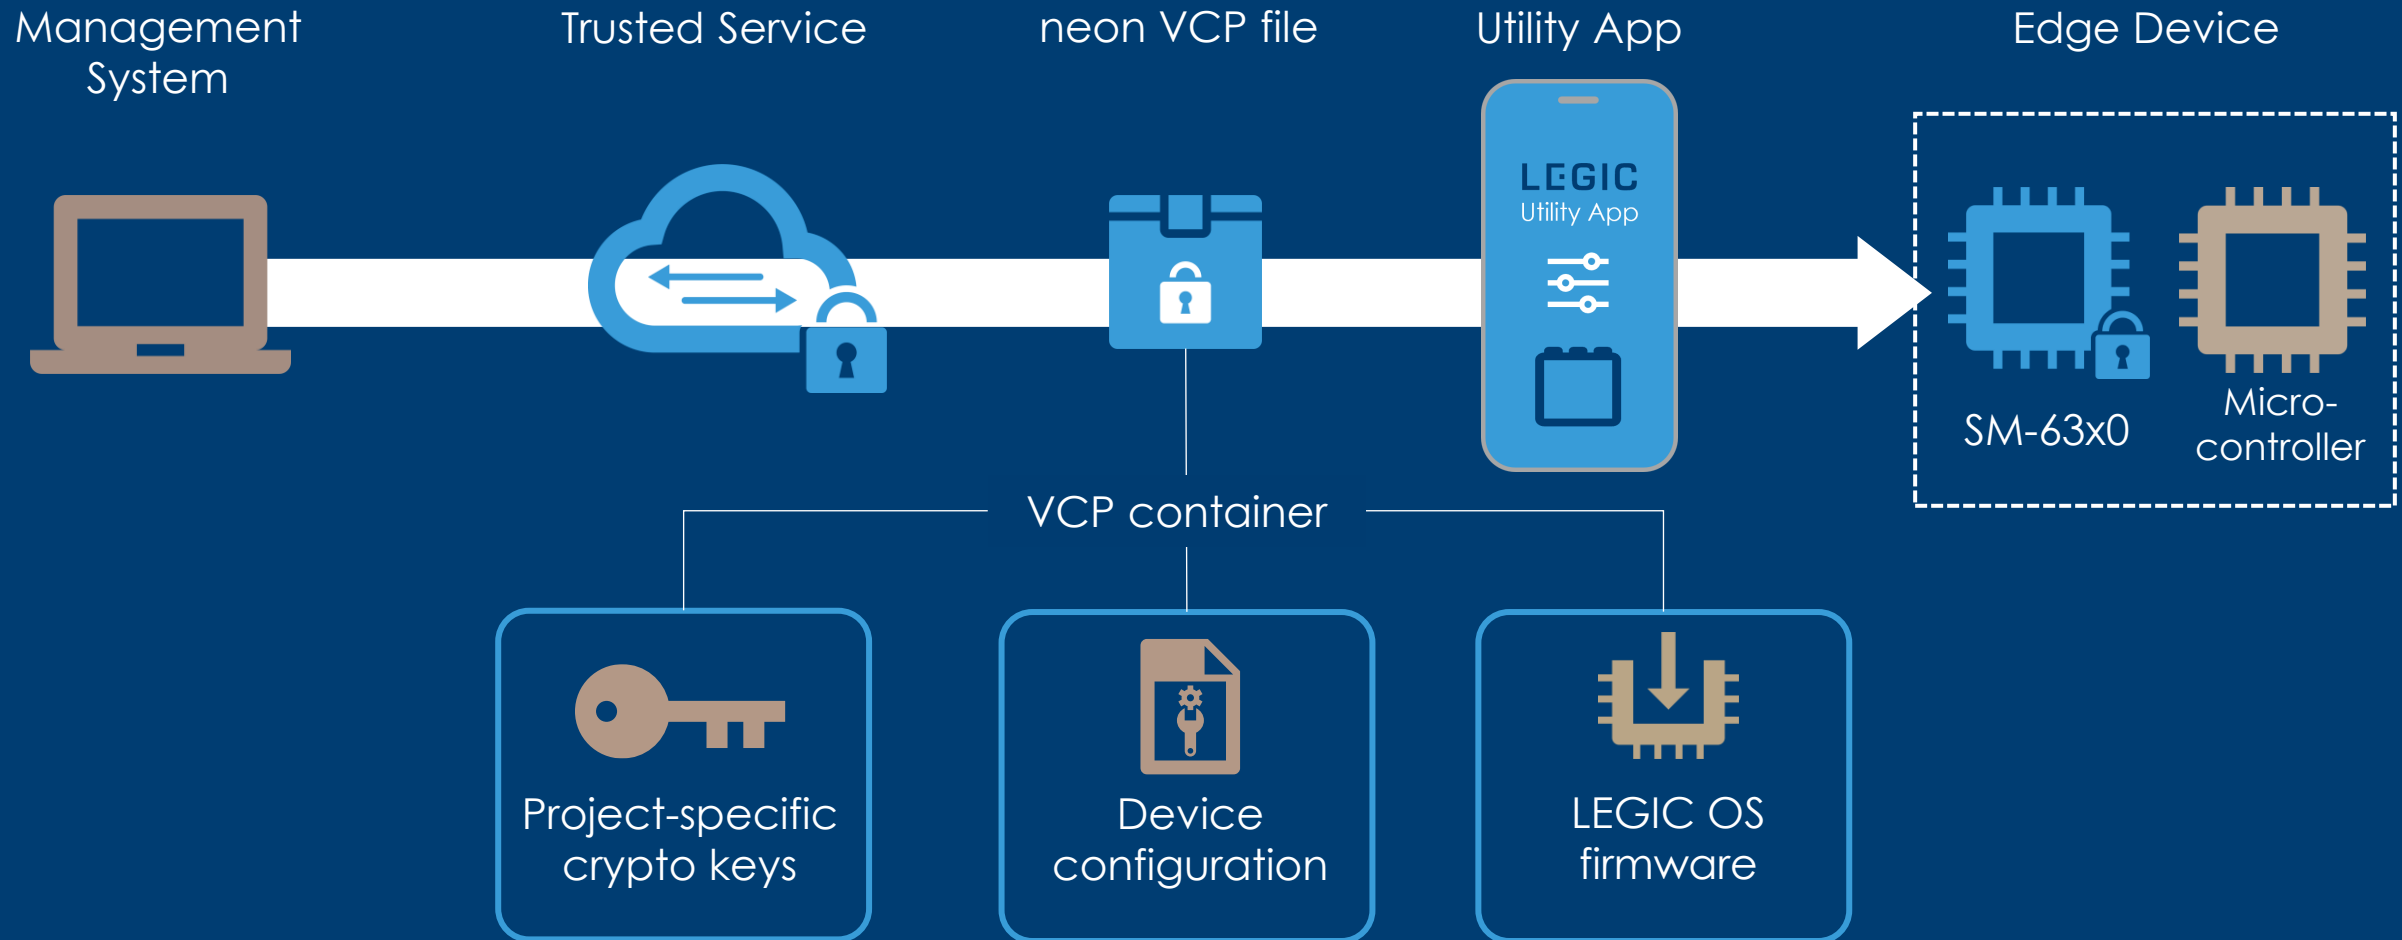

Customer application-specific parameters

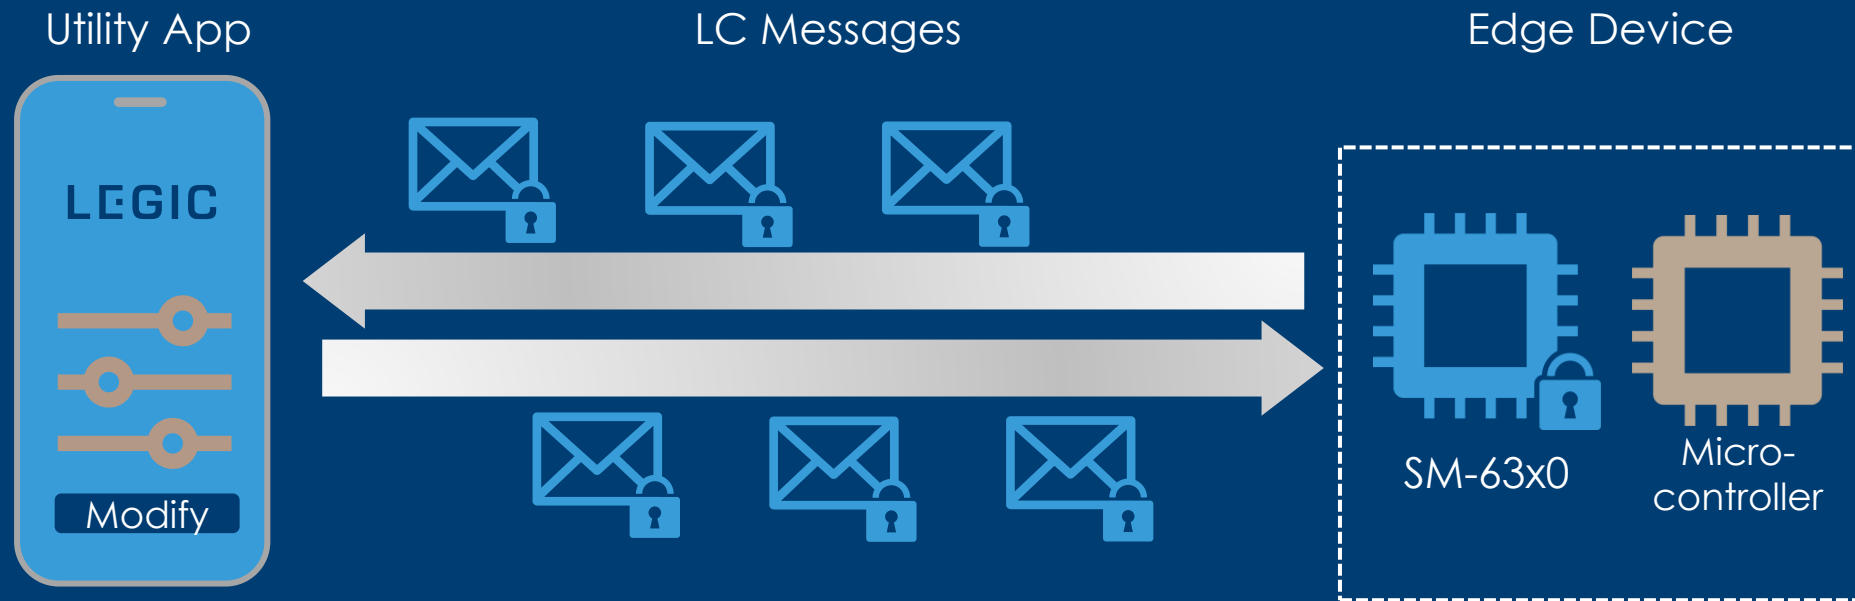

Offers possibility to read and write device configuration parameters directly from the app

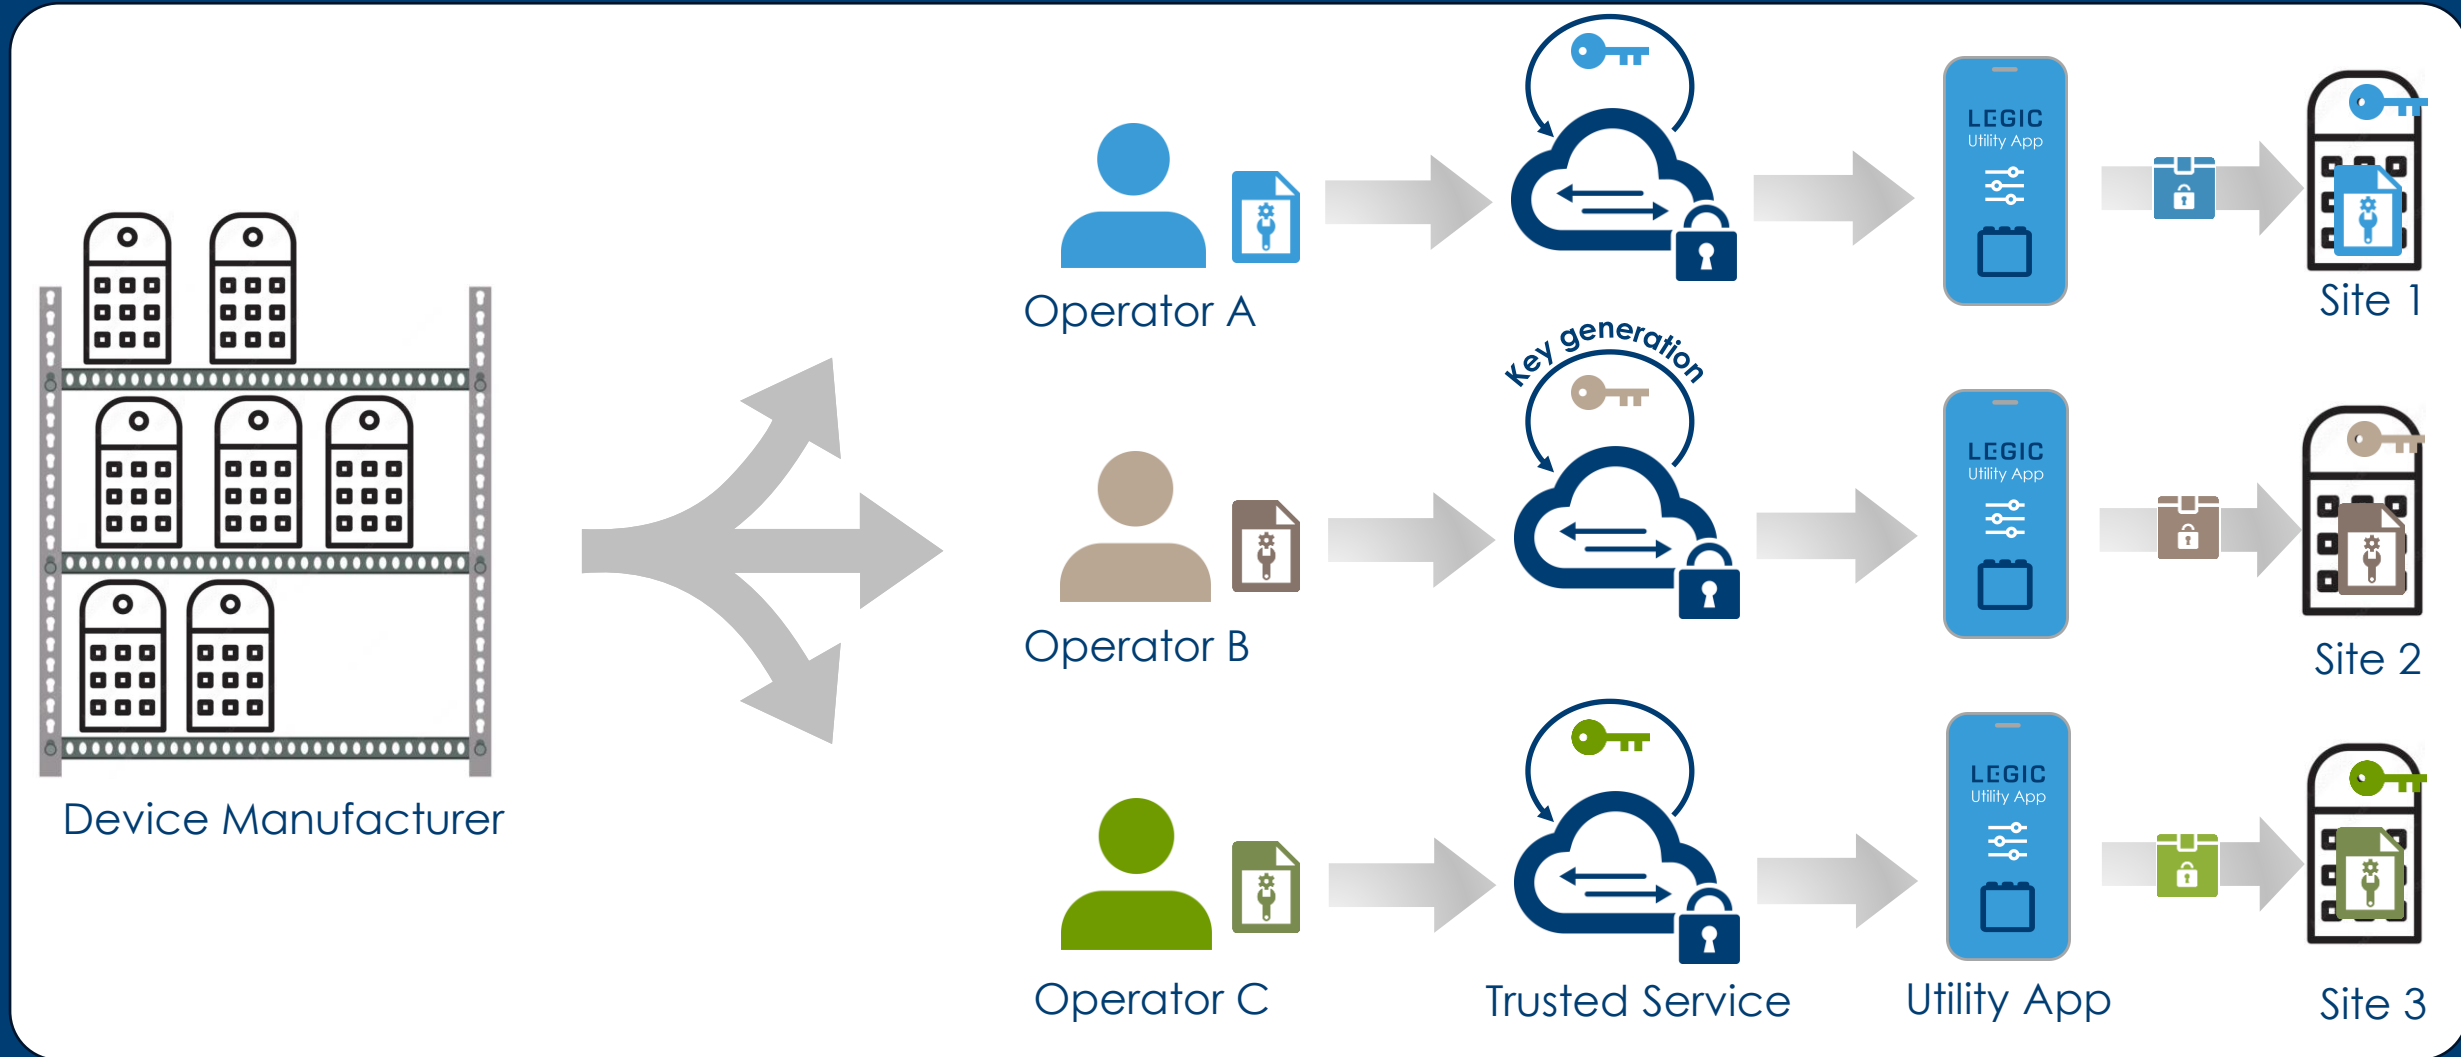

VCP Distribution with LEGIC Utility App

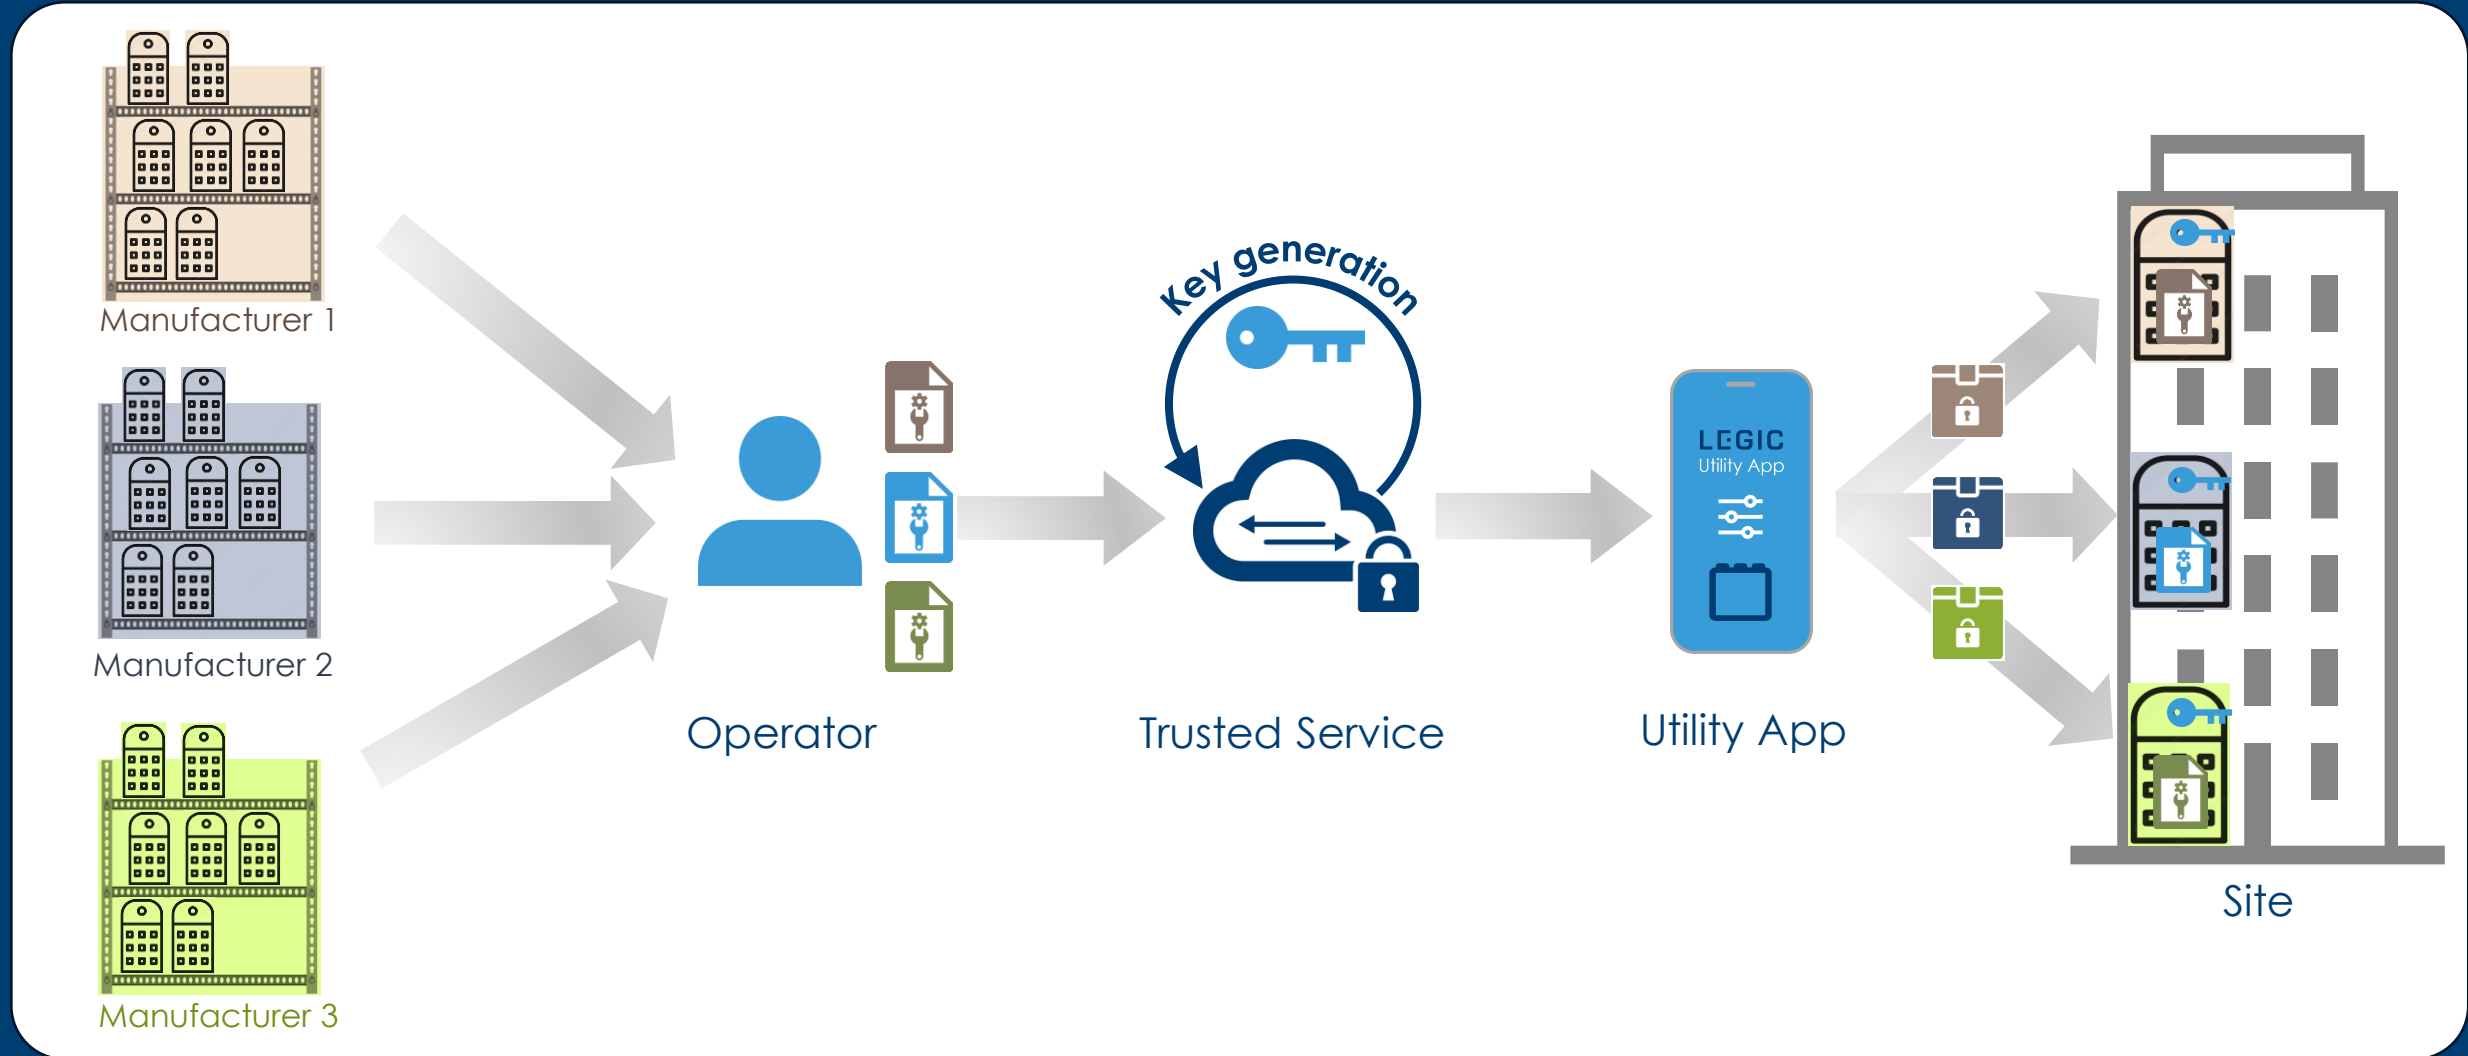

Parameter Modification with LEGIC Utility App

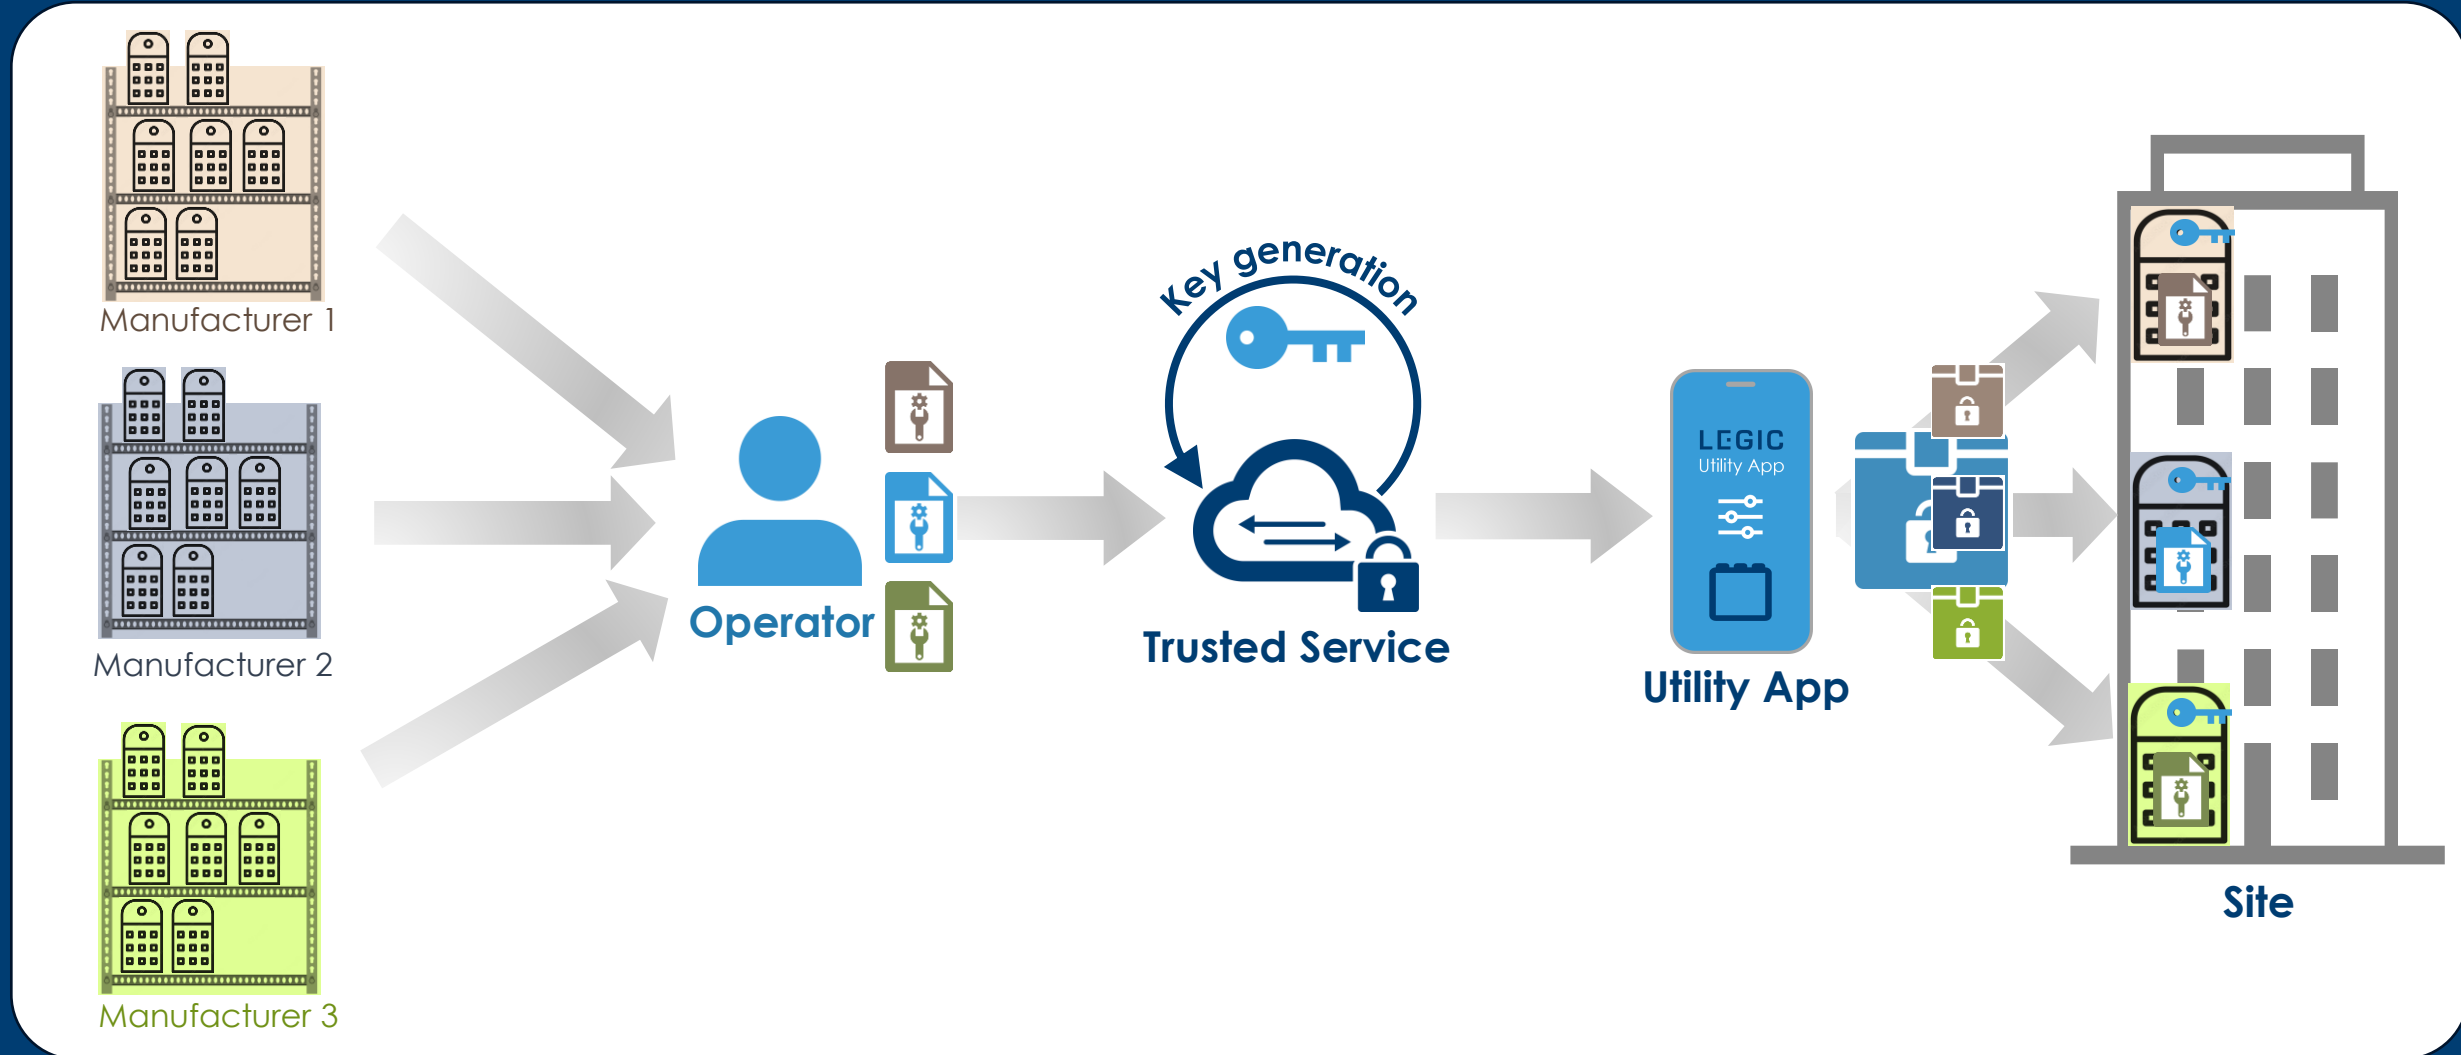

Use Cases – Generic Device Configuration

Use Cases – Universal Configuration Tool, but different VCPs

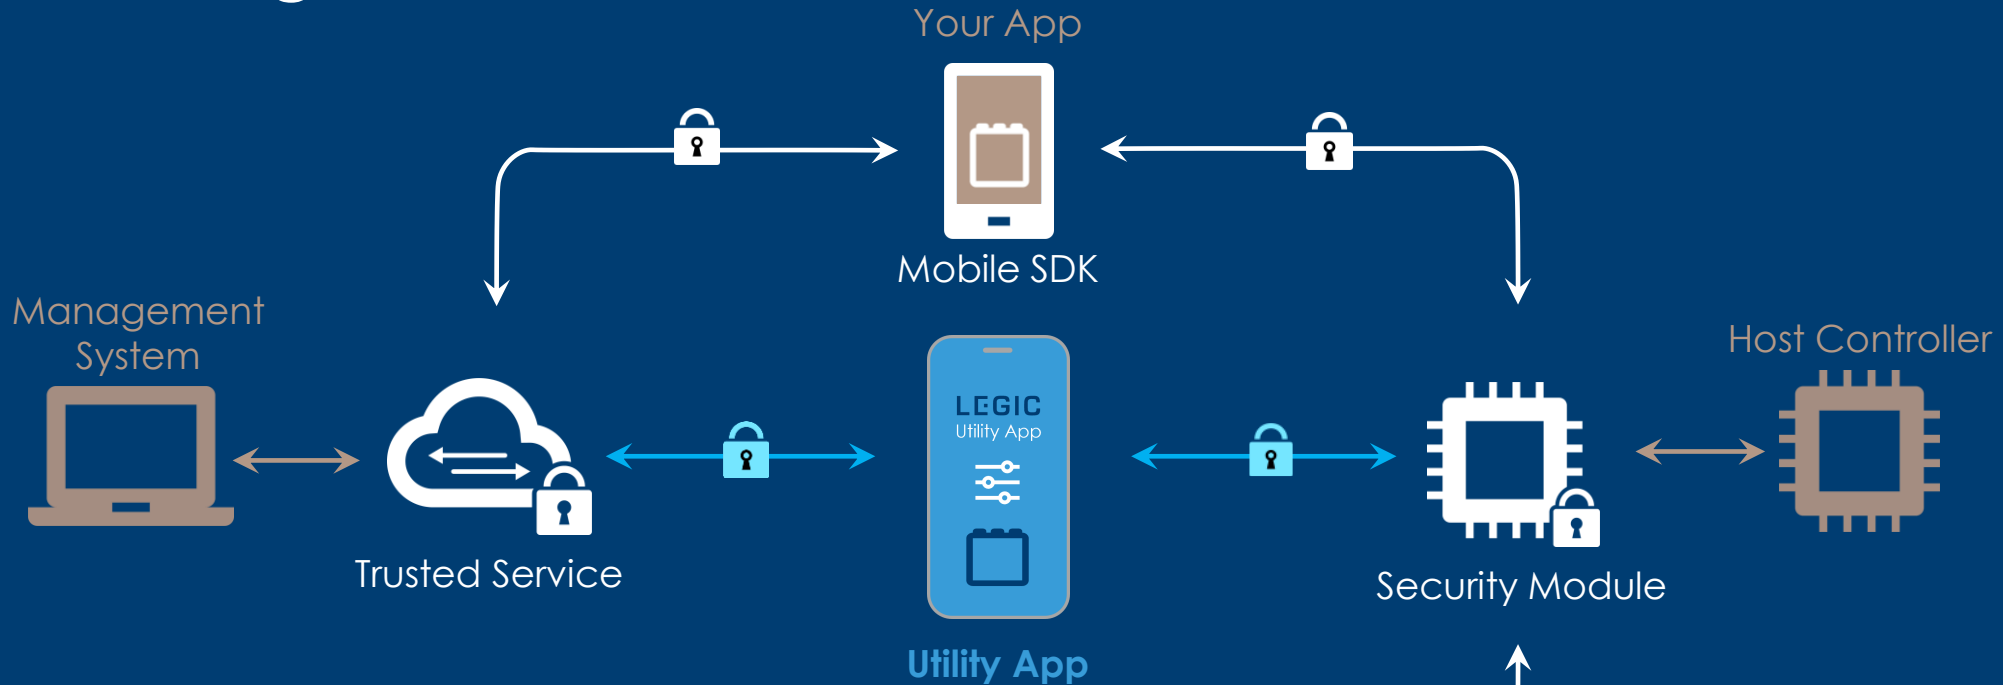

Use Cases – Universal Configuration Tool and standardized VCP

Use Cases – Parameter Modification on the App

New Offering

- Universal configuration tool supporting your process
- No need to develop own tool, save costs and effort
- Enabling LEGIC Orbit to transport non-visible cryptographic keys

 Key & Configuration Management Tools

Thank you
