

Blockchain Identity &
Token Ownership
Validation

LEGIC connect23
Presentation
September 2023

LEGIC

Why

User Authentication and Token Validation
through Wallet Interaction
is still a big pain Point and prevents
Mass Adoption.

What

Tokiphy is a Blockchain based Solution to validate User Identity and Token Ownership without requiring direct Wallet Access.

Lack of inter-
operability

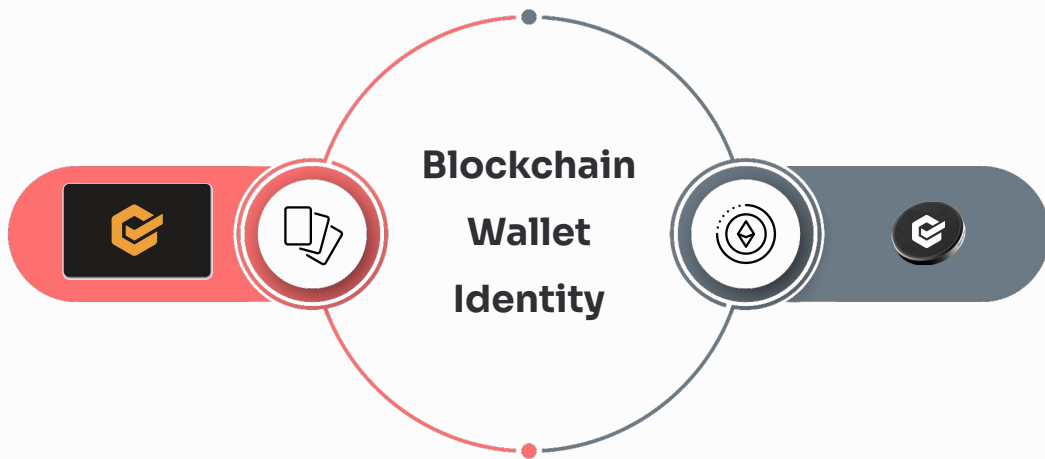

Complex

Slow

Unsecure

Blockchain users need Wallet Access
through a Computer or a Smartphone
to prove User Identity and Token Ownership!

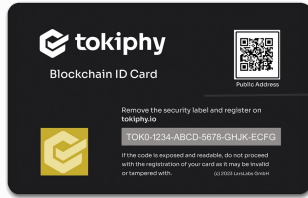

Meet the Tokiphy Card and the Tokiphy Chip powered by

LEGIC

Time-To-Market in 5 Month

One of the Fastest, Secured and Simplest Solutions thanks to LEGIC.

CTC4096-MM410

ISO-15693

SM-6300

Custom engineered Reader Device.

LEGIC

Hardware

- Tokiphy Card
- Tokiphy Chip
- POS Readers
- Access Control Systems
- IOT Solutions

Services

- Tokiphy Wallet
- Tokiphy NFT Viewer
- Tokiphy Transactions
- Tokiphy Studio
- Tokiphy Validator

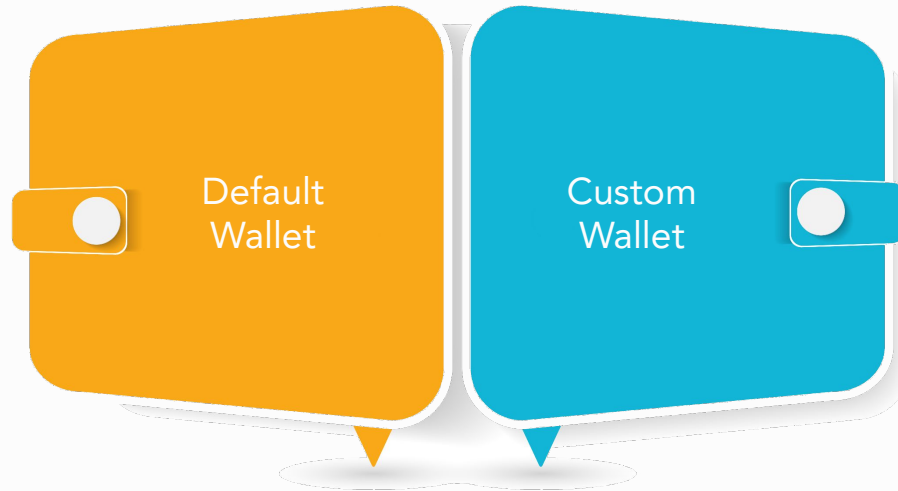

Multi-Wallet / Chain Solution

connect23

Ethereum | Polygon | Binance Smart Chain
(more are coming soon)

Tokiphy Users
can claim wallet ownership
including PK export.

Tokiphy Users
can connect their
existing wallets.

Tokiphy already comes
with three wallets
pre-assigned.

Metamask,
Wallet Connect,
Coinbase

Use Cases

AI

- Digital Authenticity
- Data Provenance
- Data Integrity
- Decision Transparency
- Trust Establishment
- Data Output Confidence
- Security Enhancement
- Manage Data Usage
- Manage Model Sharing
- Increase Sustainability
- Smart-Contract Models
- Agent Payments

Brands & Marketing

- Customer Acquisition
- Customer Engagement
- Brand Awareness
- Advertising

Supply Chain Traceability

- Agriculture
- Healthcare
- Life Science
- Manufacturing
- Logistics
- Retail
- Industry

Media & Entertainment

- Content Transparency
- Content Creation
- Ownership Rights
- Royalty Distribution
- Copyright Infringement Prevention
- Gaming

Finance & Banking

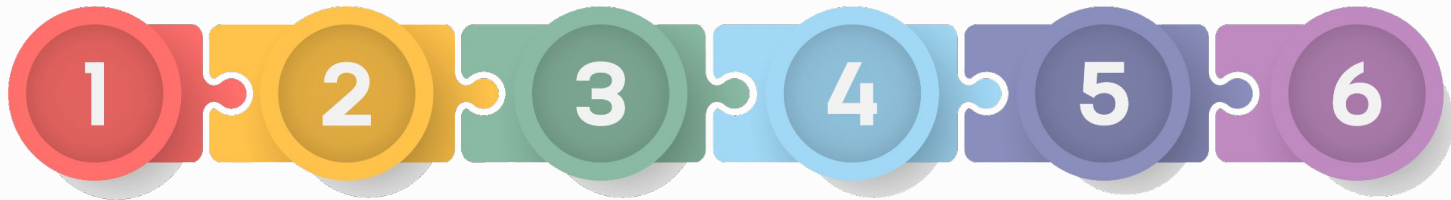

- Value Transfer
- Ownership Transfer
- NFT Transfer
- Token Transfer

Identity & Ownership

- Personal Id
- Digital Id
- Physical Id
- Digital Twin
- Authentication
- Authorization
- Access Control
- Token-Gating

Retail & eCommerce

- Customer Journey
- Shopping Experience
- Lifestyle Experience
- Marketplaces
- Product Authenticity
- Fraud Prevention

1 Works offline

No need for additional user devices.

2 Fast, Simple, Secure

Easy user onboarding, no need for existing blockchain wallet setup. Default wallet included.

3 Multi-Chain Multi-Wallet

Highly interoperable. Works wallet independent.

4 IRL Asset Transfer

Card can be "preloaded". User can claim assets at a later stage.

5 Brand Friendly

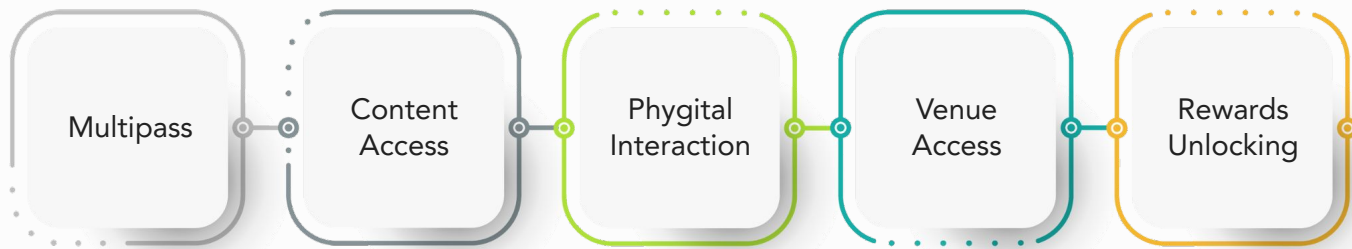

As a technology provider we serve a broad customer audience and are competitor friendly.

6 Highest Security

Engineered and build in Germany under highest industrial and cybersecurity standards. Security module and card powered by LEGIC AG Swiss.

Token-Gating
